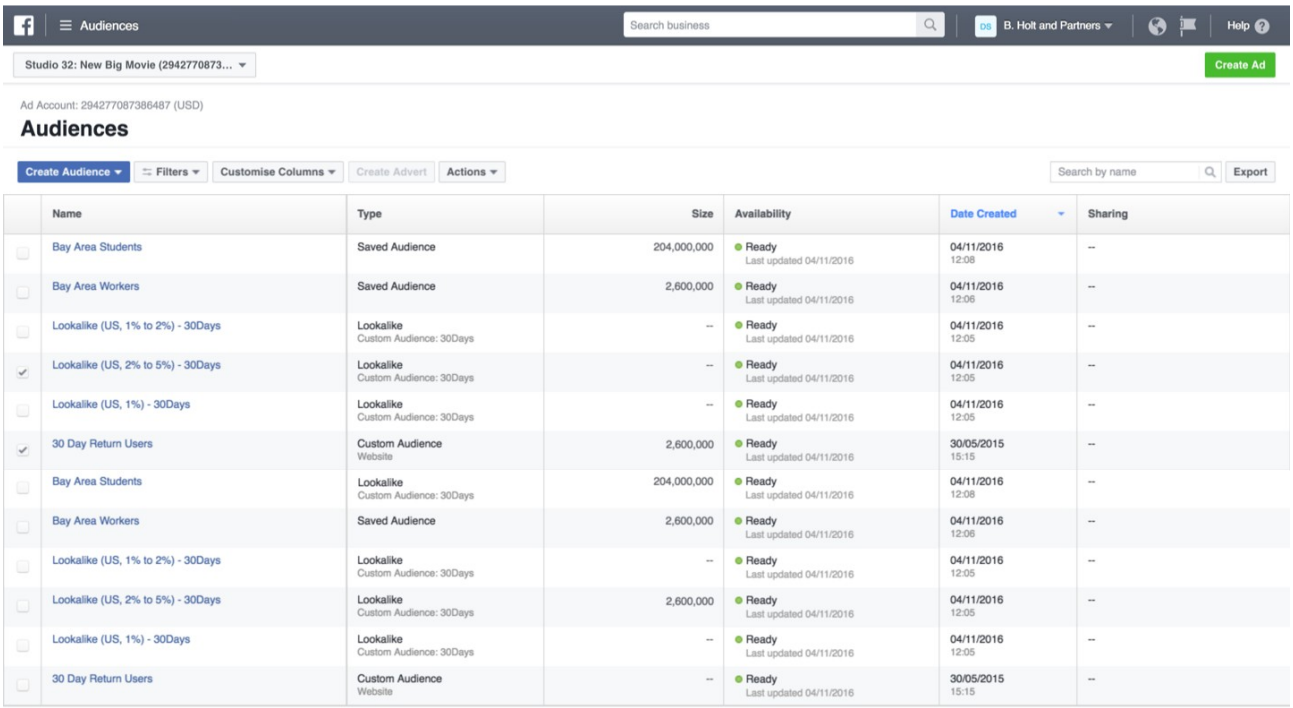
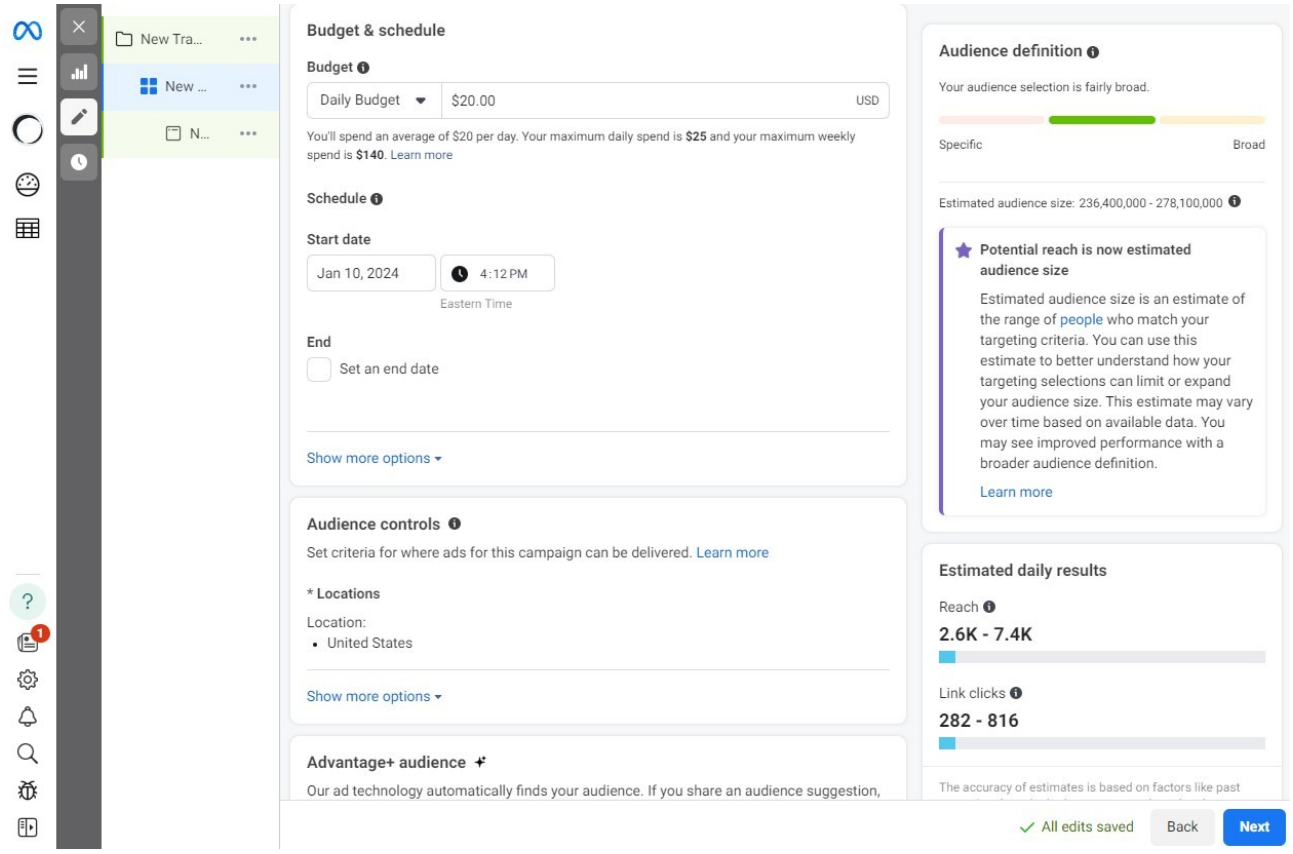
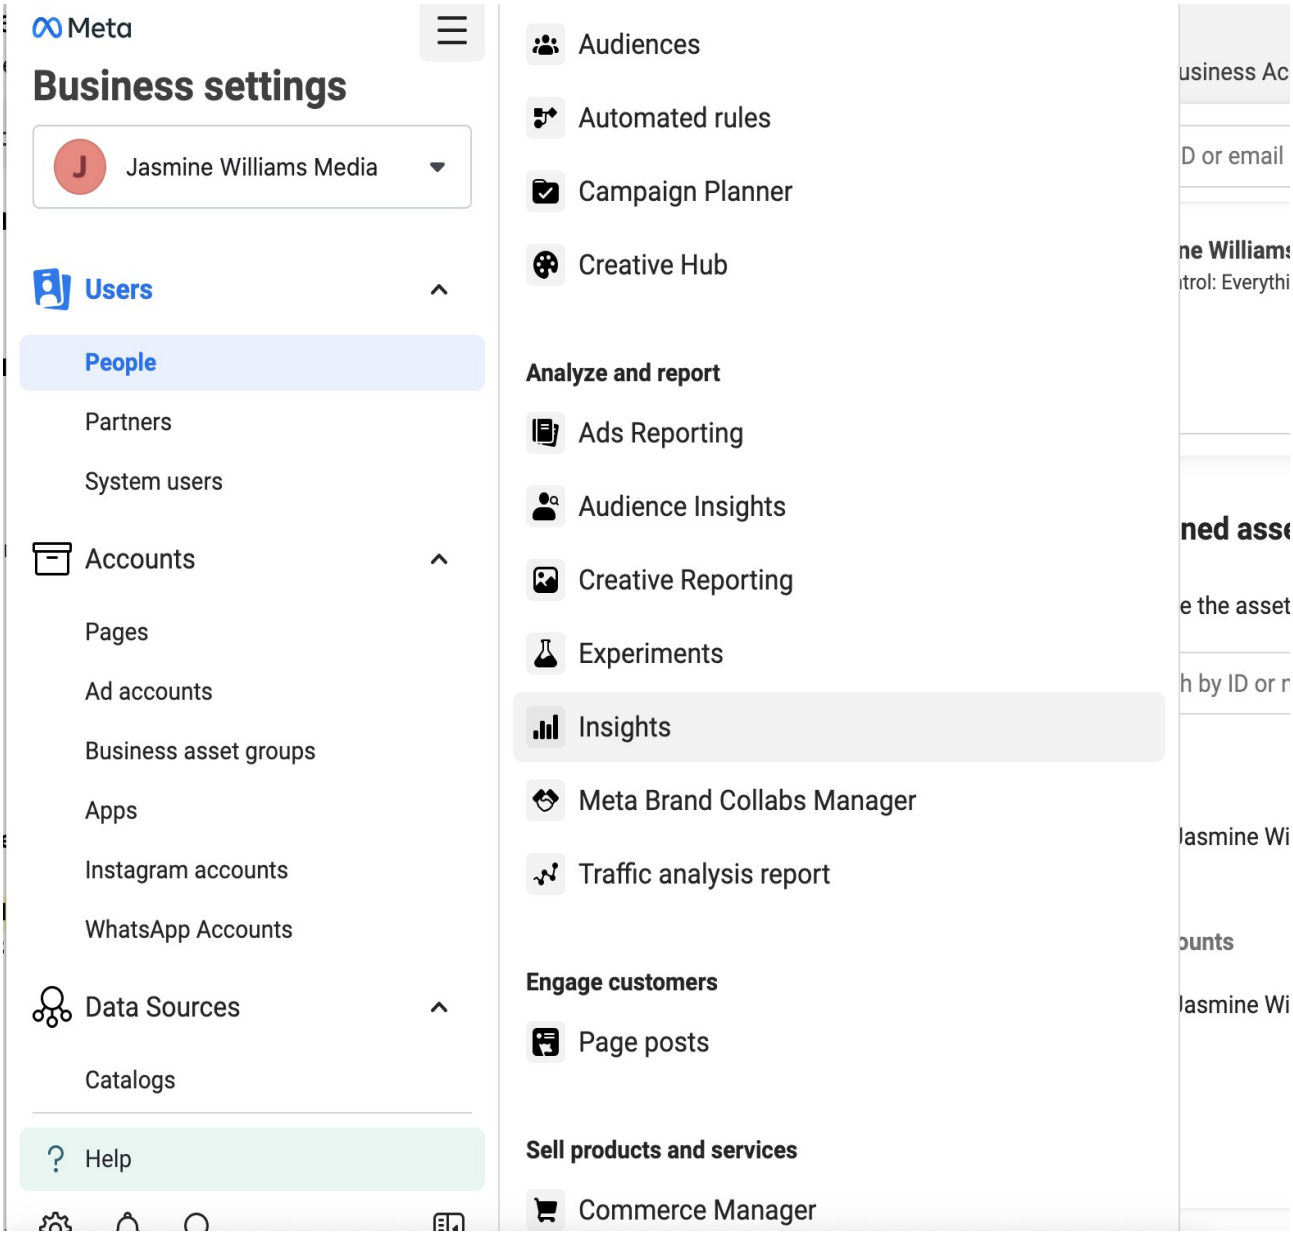
🚀 Step-by-Step Guide to Launch Facebook (Meta) Ads + Meta Pixel

🔹 STEP 1: Create a Business Account







Go to **Meta Business Manager**
👉 https://business.facebook.com

1. Click **Create Account**
2. Enter your business name
3. Add your business email
4. Confirm your email

Then:

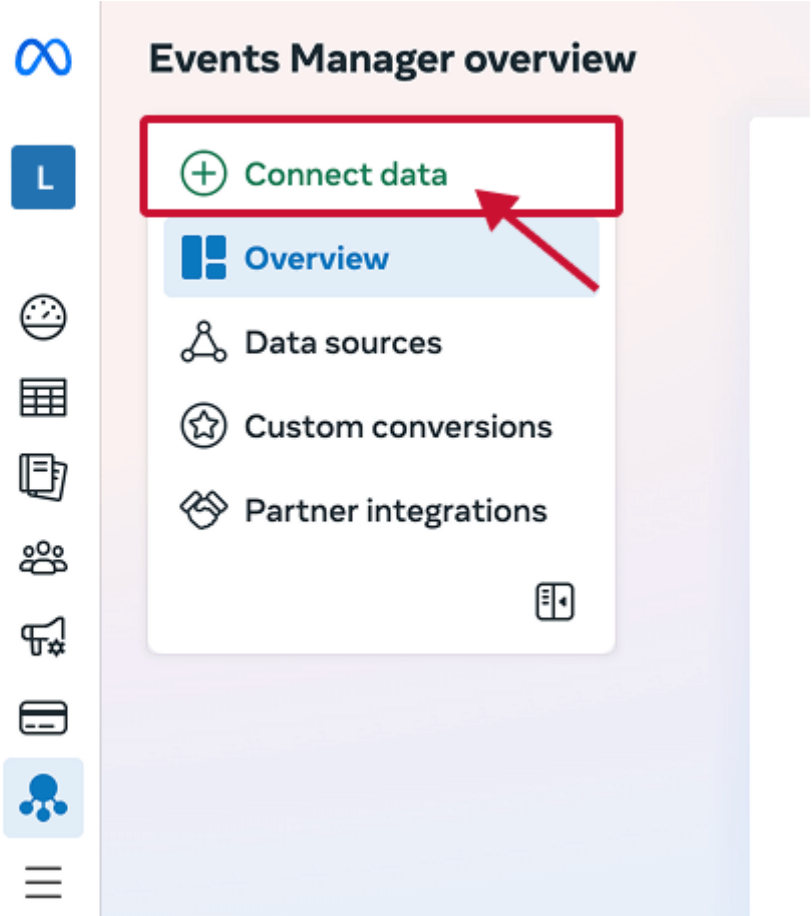
- Go to **Business Settings**

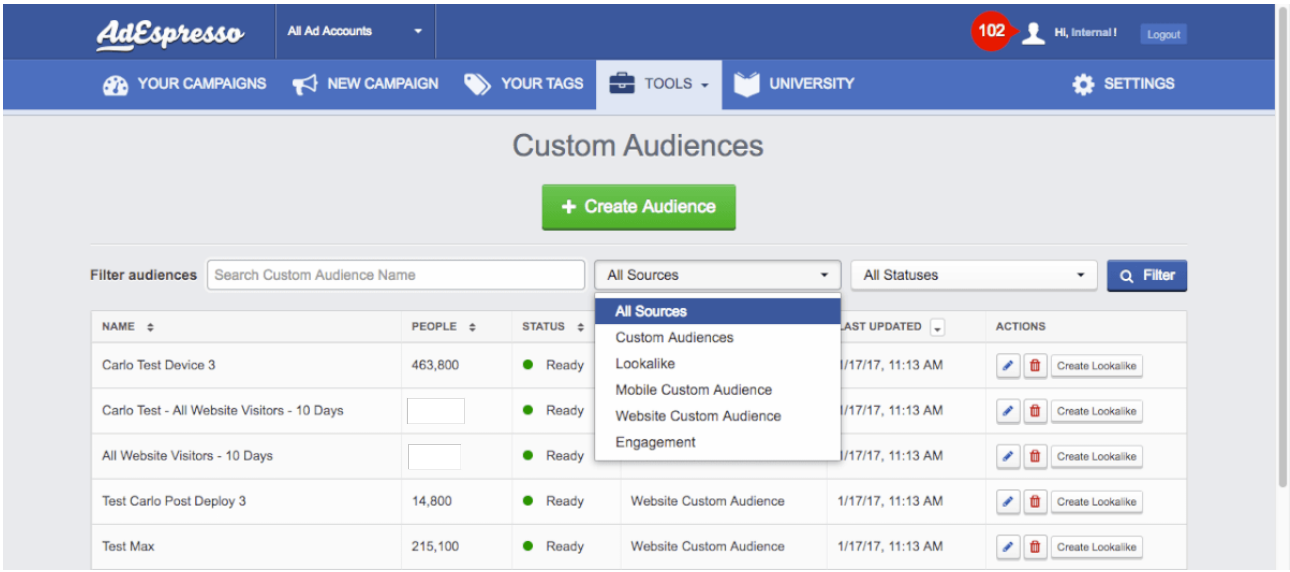
- Add or create an **Ad Account**
- Set currency (USD or your local currency)
- Add payment method

□ STEP 2: CREATE & INSTALL META PIXEL

□Create Your Pixel

events_manager_01.webp





1. Open **Events Manager**
2. Click **Connect Data Source**
3. Choose **Website**
4. Select **Meta Pixel**
5. Name your Pixel
6. Enter your website URL
7. Click **Create**

2️⃣ Install the Pixel on Your Website

🔹 Option A: Google Tag Manager (Recommended)

1. Copy your **Pixel ID**
2. Go to GTM → Create new tag
3. Choose **Facebook Pixel template**
4. Paste Pixel ID
5. Trigger: **All Pages**
6. Publish

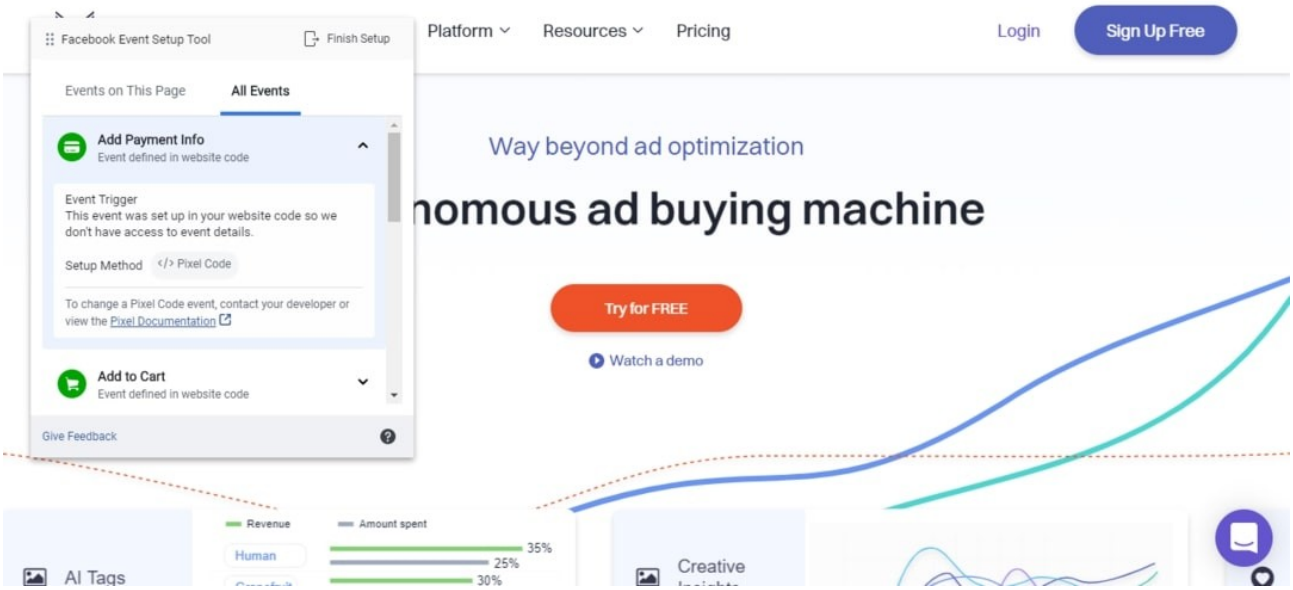
🔹 Option B: Manual Code Installation

1. Copy the base Pixel code
2. Paste it before `</head>` on every page
3. Save changes

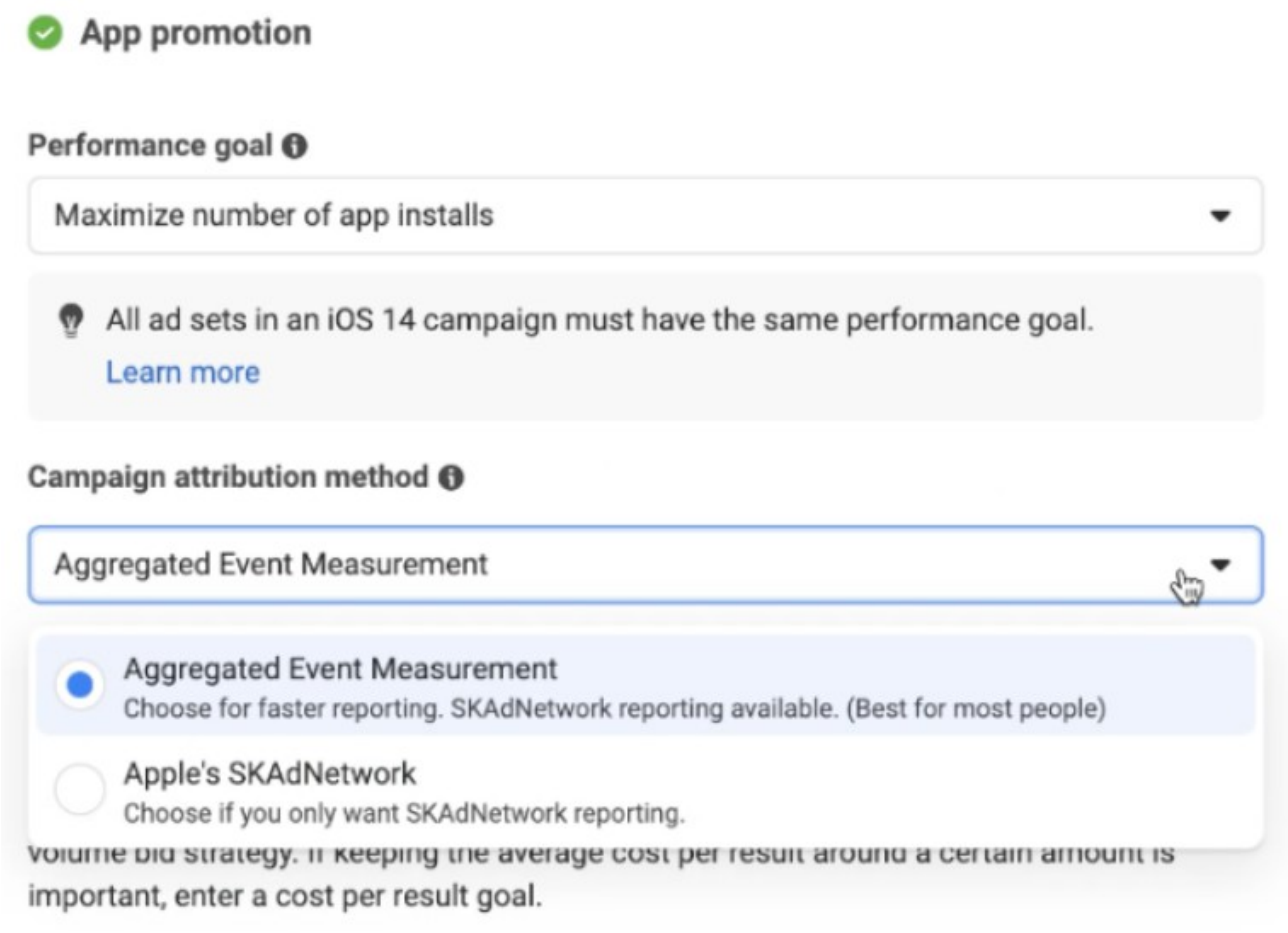
Option C: CMS Integration

- Shopify → Facebook Channel
- WordPress → PixelYourSite plugin
- WooCommerce → Facebook integration
- OpenCart → Facebook Pixel module

STEP 3: SET UP EVENTS (CRITICAL STEP)



PixelStandard2.webp



1. Go to **Events Manager**
2. Select your Pixel
3. Click **Add Events**
4. Choose **Event Setup Tool**
5. Enter your website URL
6. Add standard events

Essential Events:

- **ViewContent** – Page view
- **AddToCart** – Add product to cart
- **InitiateCheckout** – Start checkout
- **Purchase** – Completed order
- **Lead** – Form submission

⚠ If you run sales campaigns, **Purchase event is mandatory**.

□ STEP 4: VERIFY YOUR DOMAIN (Required after iOS updates)

Google Admin

Search for users, groups, and settings (

Domains > Domain Setup

Verify your domain ownership

Learn more

Add a meta tag to your homepage.

Copy the meta tag below and paste it inside the <head> section of your homepage (http://mychurch.com). The tag should go between the <head> and </head> tags, before the <body> tag.

Meta tag value:

<meta name="google-site-verification" content="

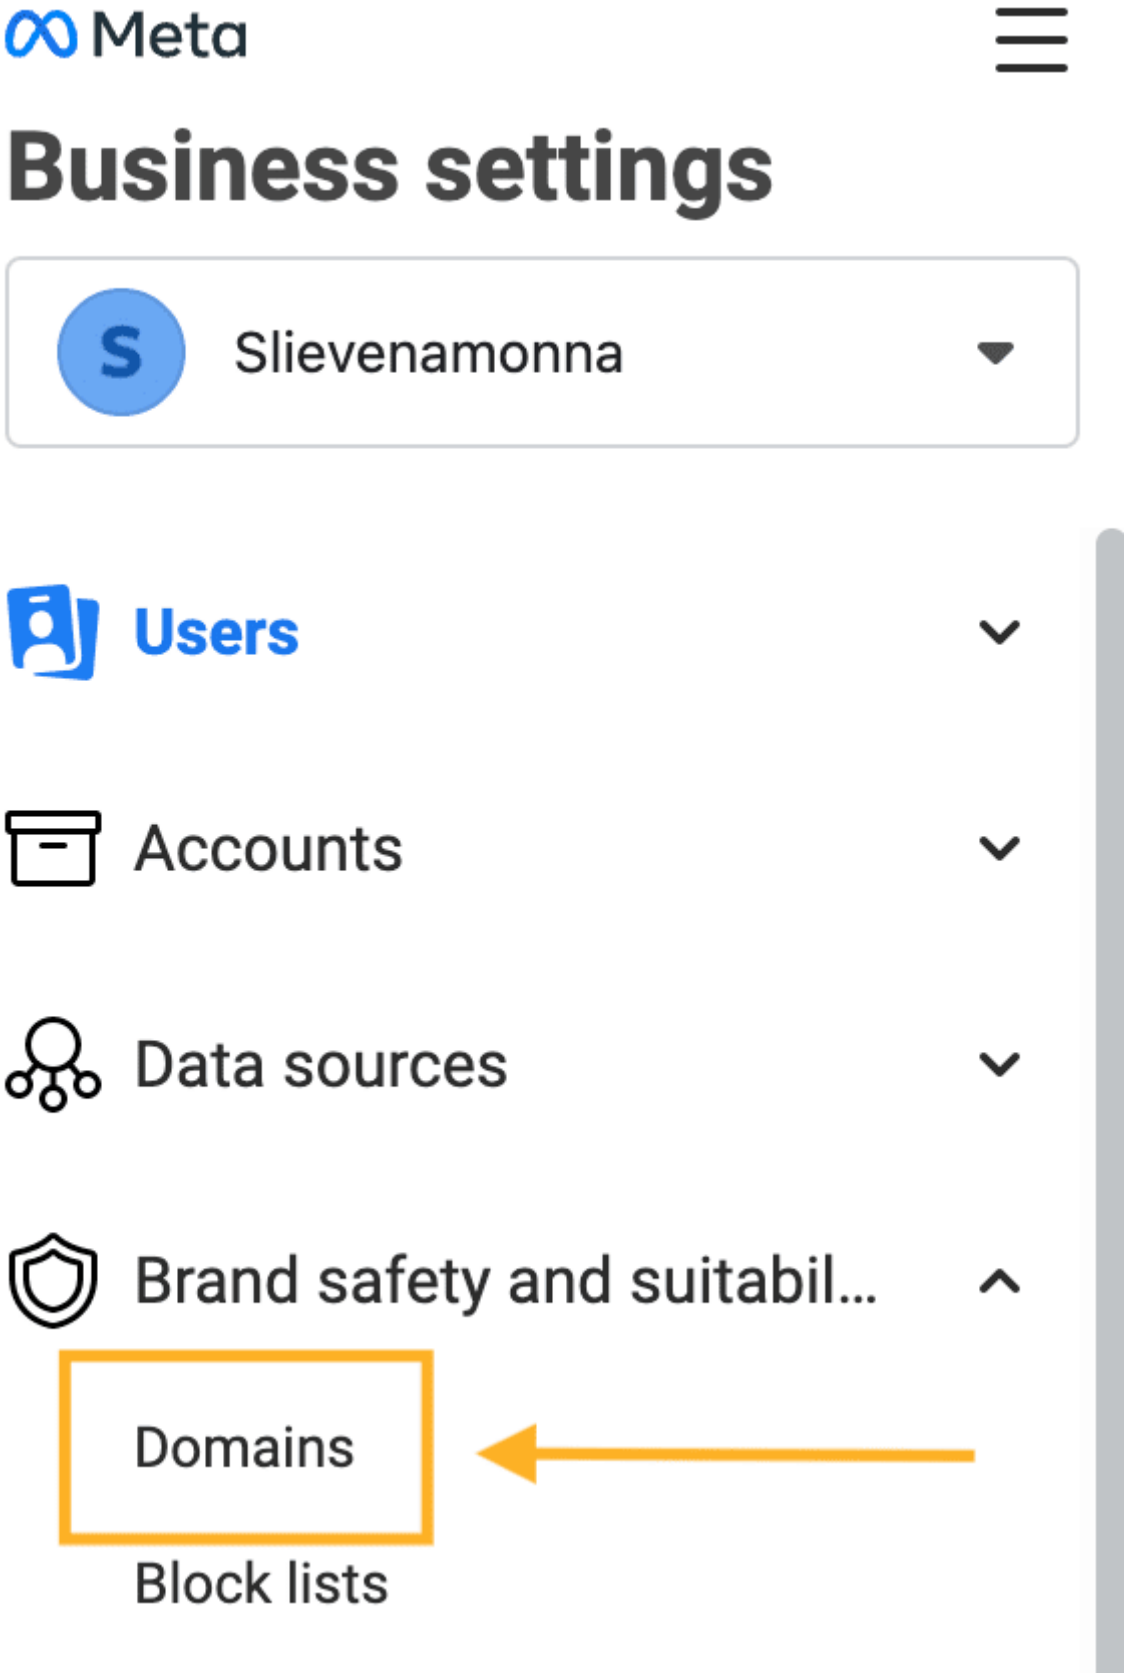
See example

or

Choose a different method

☐ **I have added the meta tag to my homepage.**

Verify



fbbusiness-add-a-domain.webp

1. Go to Business Settings
2. Select **Brand Safety → Domains**
3. Add your domain
4. Verify via:
    - DNS record
    - Meta tag
    - HTML file upload

Then configure **Aggregated Event Measurement** priority:

For eCommerce:
1️⃣ Purchase
2️⃣ InitiateCheckout
3️⃣ AddToCart

🧪 STEP 5: TEST IF YOUR PIXEL WORKS

Method 1 – Events Manager

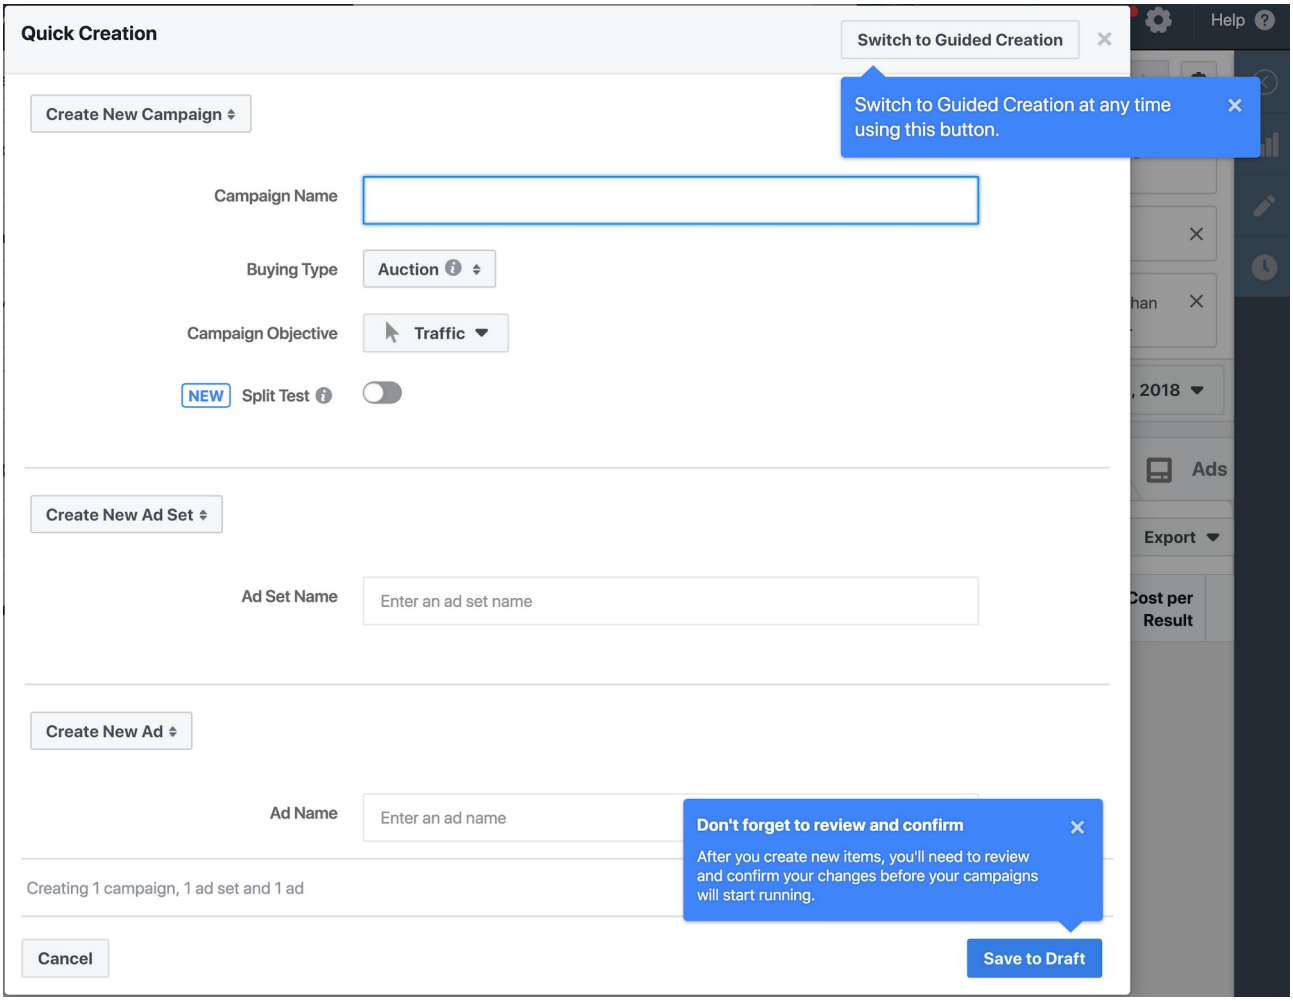
1. Go to **Test Events**
2. Enter your website URL
3. Visit your site
4. Check if events are firing

Method 2 – Chrome Extension

Install **Meta Pixel Helper**

Open your website → the extension shows whether the Pixel is active.

🚀 STEP 6: CREATE YOUR AD CAMPAIGN



Quick Creation

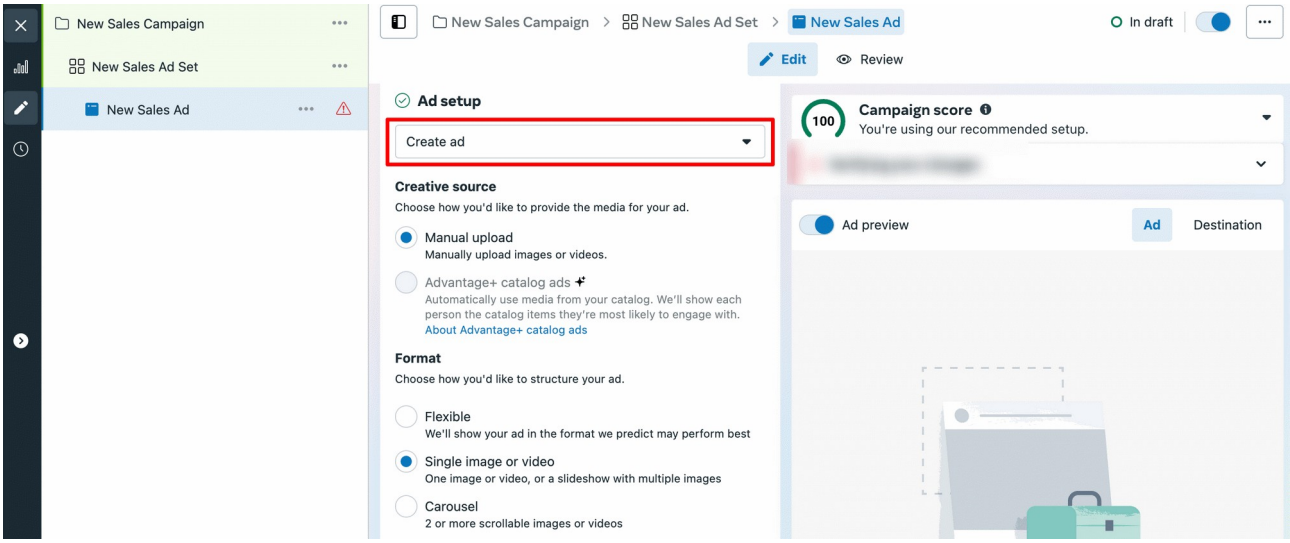
THE UA BLUEPRINT
The Ultimate Guide to Meta Ads
Objectives
Ad Platforms
Ad Formats & Sizes
Best Practices
by Kiran Malla



Go to Ads Manager
👉 https://adsmanager.facebook.com

1. Click **Create**
2. Choose objective:

Goal	Choose
Sales	Sales
Leads	Lead Generation
Website traffic	Traffic
Messages	Messages
Brand awareness	Awareness

For conversions:

- Conversion location → **Website**
- Select your **Pixel**
- Choose event (Purchase or Lead)
-

□ STEP 7: SET TARGET AUDIENCE

You can define:

- Location (Country / City / Radius targeting)
- Age
- Gender

- Language
- Interests
- Custom Audiences (website visitors, customer list)
- Lookalike Audiences

 For local business → use 5–15 km radius targeting.

💰 STEP 8: SET BUDGET

Two options:

- Daily Budget
- Lifetime Budget

Recommended for testing:

- $10–30/day per audience
- Test 3–5 creatives
- Run for 3–5 days before optimizing

📊 STEP 9: ANALYZE RESULTS

Monitor:

- CTR (1%+ is good start)
- CPC
- CPA
- ROAS (for eCommerce)

For proper optimization:

- Aim for **50 conversions per week per ad set**
